Have you experienced a Cardiac Event?

Would you be interested in sharing your experience to help research?

We are conducting a study that is aiming to understand how Coronary Heart Disease may impact ones psychological wellbeing. Specifically, we are interested in your experience and how you make decisions about your treatment and recovery following a cardiac event.

This study is being conducted under Dr Caroline Joyce and Karen Moses for the thesis component of our Masters degree in Clinical Psychology. The project has ethics approval from the Human Research and Ethics Committee of Western Sydney University (Approval number is H13265).

What to do: Click of the link: https://urlzs.com/pPtzV. Alternatively, scan the QR code seen below using the QR code scanner app on your phone.

The survey will take approximately 15 minutes to complete. You will be asked to read the information sheet and complete the consent form online before proceeding to fill out the questionnaire.

Individuals who complete the questionnaire will be invited to go in the draw to win one of eight Amazon AUD$50 e-gift vouchers for participating.

If you have any questions about the survey or our research, please contact us at 19391423@student.westernsydney.edu.au

Kind Regards,
Stephen Kelly and Jenna Laroque
